

Trefoil
Commercial Interior Fit-Out Specialists

Goals Soccer Centres PLC has over 40 centres in the UK and is the largest and most successful operator of dedicated 5-a-side football pitches in the world. Each centre has a minimum of 10 enclosed floodlit arenas with the latest synthetic grass pitches. Their aim is simple; to get more people on the pitch, playing more football every single day and they are always looking to expand to further meet that aim.

Priding themselves on providing the best facilities possible for the players, Goals approach was to deliver high quality buildings in tight timeframes. The centre in Doncaster is one of a number of projects we have been involved in and was completed to the client's exact specification in just nine weeks.

Goals guarantee that every centre will not only have changing rooms and showers, but a sports lounge and multi-use function room as well, all of which feature at Doncaster. The building is fitted with climate control, intruder alarms and fire and security systems. Easy to maintain decoration, hygenic cladding and flooring.

The modern finish of the building is due to a combination of factors. Designed around the porch features the main entrance that provides additional usable space for the rooms behind. Goals' branded graphics were used throughout the building both internally and externally to give the building its striking appearance.
