

WPP — NEW OFFICE, CARDIFF

Project Overview

Wales Pension Partnership Investment Management Company Limited (WPP) appointed Trefoil Interiors to deliver the fit-out of its new 260m² Cardiff office.

Working closely with WPP and Cooke & Arkwright, Trefoil developed and delivered a contemporary workplace combining practical infrastructure with high-quality finishes, bespoke storage, feature lighting, timber slating, acoustic solutions and carefully selected furniture.

Our design team developed a number of concepts supported by 3D visualisations and 360° imagery, allowing WPP to visualise the proposed environment and refine the design throughout the process. A visit to manufacturers' showrooms in London also enabled the team to explore furniture, fabrics and finishes in person, helping shape the final specification while maintaining budget control.

Despite landlord restrictions requiring noisy works to be carried out outside normal working hours, the project was successfully managed and completed in July 2026.

The result is a bright, modern and welcoming workplace designed to support collaboration, productivity and staff wellbeing.

Client Testimonial

“Trefoil Interiors provided an excellent service throughout the delivery of our new 260m² office space. From the initial design through to completion, the team were professional, responsive and collaborative at every stage.

Despite the challenges of working within the landlord's restrictions, Trefoil managed the programme effectively and maintained excellent communication throughout.

We are delighted with the finished office. Nothing was ever a problem or an issue; we felt heard every step of the way. The space is bright, modern and welcoming, far beyond our expectations.

We would have no hesitation in recommending Trefoil Interiors for their professionalism, expertise and commitment to delivering a high-quality project.”

Hannah Williams — Executive Assistant & Office Manager, WPP
